

Wednesday, September 29, 1971

At a regular meeting of the Board of Commissioners on the date set above at which time were present Chairman R. F. Brennan and Commissioners F. E. Knight and Chas D. Bailey, the following business was transacted.

Order setting time and place for hearing on proposed Mohler Water District was signed--Wednesday, October 27, at 10:30 a.m.

Harold Boquist advised the Commissioners that a tide gate had been installed on a culvert on Squeedunk Road and that the road had been raised and that he anticipated this would cause more flooding of his property during high water. The tide gate was installed without the knowledge of the Commissioners, as was the raising of the road bed. The matter will be investigated.

Stanley Kapustka and Roy Sanderson of the Water Resources Division U. S. Geological Survey called on the commissioners. They reported that the Trask River gauging station would be continued to the end of the fiscal year, at which time it is possible that the station could be continued with the county paying half the cost and some state agency assuming the other half. Approximate cost of maintaining the station is \$1800. They also discussed flood plain studies and indicated that a study for Tillamook County could extend over several years with the possibility of obtaining federal and state funds to help financing. A study of lakes in the county is being undertaken by the division and the county will be furnished the pertinent data when the study has been completed and statistics compiled.

William Clark of Brighton Beach inquired as to the status of the approach permit onto 101. Mr. Knight called Eldon Everton of the Highway Division in Salem who reported that the permit should be delivered to the county within a few days.

City Manager Hans Paulson requested that the county do some paving work for the city--mostly repairs. The Commissioners requested that the city attempt to get a quotation from a private contractor.
